**Subject: Management Development Program on Public Private Partnership for
Universal Health Coverage, March 7-11, 2016 at IIHMR, Jaipur**

Dear Mr. Sharma,

I am delighted to share with you that The IIHMR University, Jaipur, India contributed significantly to strengthen managerial competencies of human resources for health in South East Asia Region. The Ministry of Health and Family Welfare, Government of India identified IIHMR as "Institute of Excellence" for training and capacity building of medical and health professionals. The World Health Organization designated IIHMR as a WHO Collaborating Center for District Health Systems based on Primary Health Care.

To continue our efforts in capacity building, we are offering a five-day much needed training program by Central/State Governments and Private Sector on **Public Private Partnership for Universal Health Coverage** during **March 7-11, 2016** at IIHMR, Jaipur, India. The program is designed for senior and middle program managers for planning, monitoring and evaluating PPP initiatives in healthcare settings. The program will provide an opportunity to interact with key faculty in the area of PPP. Please find attached the program brochure for your information.

I would appreciate it very much if you could nominate 5-6 professionals from your organization under this important training program.

Thanks and regards

Prof. P.R. Sodani, PhD, MPH (UNC-CH, USA)

LIHMR UNIVERSITY

Institute of Health Management Research
Jaipur, India

WHO Collaborating Centre for
District Health System based on Primary Health Care

Background

Public private partnerships (PPPs) are increasingly being utilized to meet development goals of any countries and there is huge potential for PPPs to advance universal health coverage. Today, the healthcare system in India faces lot of challenges in raising the service quality and ensuring equitable access to people while simultaneously gearing up its capabilities to tackle the changing disease incidence profiles. These challenges need to be addressed through a collective effort of both public and private sectors with suitable policy framework. The PPPs in Healthcare settings are important in developing the key thrust areas such as health infrastructure development, management and operations of hospitals, health programs and initiatives, training and capacity building for enhancing managerial, clinical and technical competencies, developing financing mechanism, designing and implementing healthcare IT for sustained development, and many more to advance the philosophy of universal health coverage.

PPP is a strategic move towards achieving universal health coverage and governments and development partners are keen to implement this strategy for sustained developmental goals. However, to implement PPP strategies in health sector, there is need for better understanding about the public private partnerships, skills required for creating enabling environment for PPPs, developing innovative PPPs to address policy goals, implementation framework, and monitoring and evaluation of PPPs.

With this background, the IIHMR University, Jaipur has designed a five-day Management Development Program on Public Private Partnership for Universal Health Coverage for middle and senior professionals of healthcare industry. Earlier, IIHMR has designed and conducted one-month and two-month duration WHO Fellowship Training Programs on Public Private Partnership in Health for the Ministry of Health and Family Welfare, Government of India, in which more than 100 officials participated from Government of India.

Program Description

This is a short duration training program developed in the context of health sector reforms environment. The program will help the participants to improve efficiency in service deliver, management of hospitals, reducing financial burden on households due to illness and hospitalization, enhancing access to health care services, improving quality of services, and equity. The program would give an opportunity to exchange the knowledge and experience on innovations in improving access, quality and affordability of health care in India and low and middle income countries. The program would provide opportunity to learn the context of PPP and policy environment, examines the existing PPP innovations and explores the major issues currently being faced by implementers and key stakeholders, discusses several potential small and large scale PPP reforms to the Indian healthcare system and evaluates their likely effects on healthcare spending, quality of care, and access to care.

Program Objectives

At the conclusion of the program, participants should be able to:

- a) Understand health systems and universal health coverage
- b) Understand policy environment for role of private sector;
- c) Discuss scope, issues and challenges in implementing PPP
- d) PPP frameworks and models in healthcare settings
- e) Describe issues and challenges in designing, implementing, monitoring and evaluating PPP mechanisms

For Whom

This program is designed for middle to senior level program managers working in public health and involved in planning and implementing health care innovations across multiple levels and locations. The target participants for this program would therefore include policymakers, planners and
