No. DJB/ AC (L&E)/Kanoongo/2020/ 51777

Dated: 12-10-2020

**Subject: - Identification of concessional locations for charging/battery swapping of Electric Vehicles as per Delhi EV Policy 2020.**

Please find enclosed herewith copy of D.O.No. F.DTL/401/32/2020/CMD/130 dated 23.09.2020 of Chairman & Managing Director, Delhi Transco Limited on the subject cited above.

In this connection, I am directed to request you to kindly identify the DJB land for charging/battery swapping of Electric Vehicles and send a list of such site for onward submission to Delhi Transco Limited.

This may be treated on top priority basis.

D.O. No. FDTL/40/32/2020/CM/D/130  
Dated : 23.09.2020

Dear Nikhil,

**Subject:- Identification of concessional locations for charging/battery swapping of Electric Vehicles as per Delhi EV Policy 2020.**

*25/09/2020*  
CEO  
MCA  
DIR (M&P)

The Delhi Electric Vehicle Policy, 2020 notified on 7th August, 2020 identifies the availability of charging infrastructure as a key driver of Electric Vehicle (EV) adoption. The Policy has therefore set an objective of providing accessible public charging and battery swapping facilities within 3 km travel from anywhere in Delhi. This will be critical to ensure mass adoption of EVs and bring about a major reduction in vehicular pollution.

Delhi Transco Ltd. (DTL) is an undertaking of Govt. of NCT Delhi, working as State Transmission Utility of Delhi. DTL has been responsibly playing its role in establishment, upgrading, operation and maintaining the EHV(Extra High Voltage) Transmission Network.

Further, Delhi Transco Ltd (DTL) has been appointed as the State Nodal Agency (SNA) in NCT of Delhi for setting up of citywide charging infrastructure, as required under guidelines for Charging Infrastructure of Electric Vehicles issued by Ministry of Power, Government of India vide notification no. 12/2/2018-EV dated 14.12.2018. As per the decisions taken at the meeting of Working Group on Accelerated Rollout of Charging Infrastructure in Delhi held on 17.09.2020 (minutes attached), it was agreed that all land-owning agencies will be requested to identify concessional land locations for the installation of public charging stations for electric vehicles within two weeks i.e. latest by 09.10.2020.

Land owning agencies may identify the sites for setting up public charging station considering the following points:-

1. The site can be located within any vacant/unused land owned by your agency e.g., land abutting/adjacent to neighbourhood parks and markets, office complexes, under flyovers, etc.

2. The site can be located within any land being used currently by your agency but can be made available for public access for EV purposes only for a minimum of 12 hours in a day (e.g. inside bus depots, office complexes, night charging only at bus terminals, metro stations etc.).

*Please put up.*

:2:

3. Clause 12 of the Delhi Maintenance and Management of Parking Places Rules, 2019, mandates civic agencies to identify and provide an area within each parking facility to be used for electric vehicle (EV) charging and battery swapping facilities. All authorised parking lots may therefore be included in the list of concessional locations. The charging site should be located within an existing parking site - on or off street, at grade/surface parking or multilevel.
4. A minimum contiguous area of 3 ECS (Equivalent Car Spaces) should be available at each identified site, although larger areas are preferred. Further,
  - a. Priority should be given to identification of surface parking sites near high traffic volume zones
  - b. The site should have direct and easy ingress and egress from a public road
5. DTL, in consultation with DDC and GNCTD, will decide on 200 priority locations wherein EV charging facilities will be set up in the first phase and invite bids from Energy Operators to install and operate these charging facilities with subsidy support from State EV fund.
6. Sites identified should be available for leasing or sub-leasing at a concessional rate for a period of 10 years. The details of the leasing arrangement shall be worked out between DTL and the land-owning agency after the site is shortlisted in the list of citywide charging/swapping stations.

Early and accurate identification of sites for location of public charging facilities for EVs are a critical element of the Delhi Electric Vehicle Policy, 2020 and will help in moving ahead for ensuing mass adoption of Electric Vehicles in NCT of Delhi.

It is therefore requested to instruct the concerned officer to provide the identified list of such sites as per Annexure-A latest by 09.10.2020, so that electric charging infrastructure could be made available in Delhi.

*Warm Regards,*

Yours sincerely

*Padmini*
